Hot Car Safety

Every year children and pets die from heatstroke in cars, either because they were left or became trapped. More than half of these cases were because an adult forgot about the child or pet in the back seat.

To help avoid this catastrophe:

- Put your purse or phone next to the child's car seat so you'll always check the back before leaving the car.
- Keep a stuffed animal or memento in your child's car seat when it's empty. Move it to the front as a visual reminder when your child is in the back seat.
- Making a habit of checking your vehicle before getting out could save a life.

Secure Your Load

When you are carrying a load in your truck or pulling a loaded trailer please be careful that your load is secured.

Here are important tips:

- Before driving, make sure everything in your vehicle is tied down
- Secure larger items directly to your vehicle
- To keep smaller items from flying out, cover them with tarps, nets or covers
- Don't overload your vehicle
- Your vehicle's load shouldn't go above the level of your truck or trailer
- All items should be covered to keep them stable
