### LEGAL NOTICE

At the meeting of The Anson County Board of Health on May 9, 2017, the board will adopt the 2016 model rule for the postexposure management of dogs and cats recommended by the North Carolina Division of Public Health.

This model rule for rabies postexposure management of dogs and cats implements and particularizes the authority given to the local health director in G.S. 130A-197 to effectively and efficiently protect the public's health utilizing the most current science. Accordingly, the Anson County Board of Health will adopt the recommendations and guidelines for rabies postexposure management of dogs and cats specified by the National Association of State Public Health Veterinarians in the 2016 edition of the Compendium of Animal Rabies Prevention and Control (Part 1. Rabies Prevention and Control B. Prevention and control methods in domestic and confined animals. 5 Postexposure Management). These provisions of the Compendium shall be required control measures in the County of Anson pursuant to G.S. 130A-197, effective May 10, 2017.

Copies of the rule are available at the Anson County Health Department. The new control measures will result in fewer dogs and cats euthanized, shorter quarantine periods (4 months rather than six months) and allow for more 45-day owner (at-home) observations for lapsed animals with appropriate documentation.
