Anson County – County-wide Zoning Map Development

Drop-in/Open House Sessions on April 14, 19, 26, and May 5, 2028 | 6:00 pm – 8 pm

Over the past year, Anson County has worked to develop a draft county-wide zoning ordinance for the unincorporated areas of the County based on the approved comprehensive land use plan. The zoning ordinance draft has been completed (Phase 1), which is available on Anson County website. Work has now begun on drafting a zoning map (Phase 2) in line with the draft zoning ordinance. The County will hold a series of Drop-in/Open Houses in April/May for residents/property owner to attend to find out what their property is proposed to be zoned. For those who are unable to attend the Open Houses, the draft map along with a property parcel list will also be placed on the Anson County's website to provide residents with their proposed zoning district. In addition, zoning district descriptions will be provided. The drop-in Open Houses sessions will be open to the public on April 14, 19, 26, and May 5, 2022 from 6:00pm -8:00pm. Each Open House is designed to provide residents/property owners with the proposed zoning district for their property and zoning district descriptions. Anson County Planning has made every attempt, where possible, to match the proposed zoning district with the existing land use on the property. If the existing use on the property was not in line or consistent with the overall surrounding proposed zoning district pattern for an area, then then non-conforming use designation or zone was assigned. The existing use can continue to operate in accordance with zoning ordinance provisions. Residents can attend one or all of the available drop-in Open Houses below:

- Thursday, April 14; Morven, NC @ HOLLA,**
 229 Main Street Morven, NC 28119
 6:00pm – 8 pm
- Tuesday, April 19; Polkton, NC @ South Piedmont Community College L.L. Polk Campus**

Energy Efficiency Tip of the Month

When streaming content, use the smallest device that makes sense for the number of people watching. Avoid streaming on game consoles, which use 10 times more power than streaming through a tablet or laptop. Streaming content with electronic equipment that has earned the ENERGY STAR® rating will use 25% to 30% less energy than standard equipment.
