## Anson County's July Unemployment Rate at 11.4 Percent

Anson County's unemployment rate for July was 11.4%, basically unchanged from June's 11.5% rate. The state of North Carolina's unemployment rate for July was 9.1%.

In July 2012 Anson County's unemployment rate was 12.8%. Unemployment rates in Anson County continue to trend about one percent lower in 2013 than in 2012.

Anson's total labor force in July was 10,968. Of that number 9,720 were employed and 1,248 were unemployed. In June the total labor force was 10,998, with 9,734 employed and 1,264 unemployed. Anson County lost 16 jobs over the month of July, but the smaller labor force caused the unemployment rate to decrease slightly. Just like in June's report, Anson County's employment ranked 83rd out of North Carolina's 100 counties for July.

In July 2011 Anson County had 8,491 employed, in July 2012 9,686 were employed, and July 2013 showed 9,720 employed. Clearly the number is improving.

Unemployment rates (not seasonally adjusted) decreased in 81 of North Carolina's counties in July, increased in nine and remained the same in ten. Twelve of the state's metro areas experienced rate decreases, one increased and one remained unchanged.

Scotland County had the highest unemployment rate at 16.0 percent while Currituck County had the lowest at 5.3 percent. Among the metro areas, Rocky Mount at 13.3 percent experienced the highest rate and Asheville at 6.8 percent had the lowest. The July not seasonally adjusted statewide rate was 9.1 percent.

When compared to the same month last year, not seasonally adjusted unemployment rates decreased in 97 counties, increased in two and remained unchanged in one. All 14 metro areas experienced rate decreases.

The number of workers employed statewide (not seasonally adjusted) increased in July by 16,507 to 4,319,371, while those unemployed decreased 6,726 to 431,935. Since July 2012, the number of workers employed statewide increased 25,227, while those unemployed decreased 45,241.

## From the Sheriff's Desk Schools Are In, Please Be Careful

From Anson County Sheriff Tommy Allen: Our local schools got off to a good and safe start last week, at least from a public safety point of view. We had deputies providing patrol and traffic assistance at all the schools out in the county. The Wadesboro Police provided similar assistance at the schools in Wadesboro as did officers in Lilesville and Morven. The NC Highway Patrol also has been asked to patrol the school zones. Speeding through a school zone can be a very expensive ticket and is a mandatory court appearance.

I urge everyone to use extra caution around school zones as students, parents and teachers all begin new routines. There may be some traffic congestion around schools, especially the first couple of weeks. Kids will be excited and parents will sometimes be frustrated with having to hurry up and wait.

I encourage everyone to take your time - leave a little earlier than usual - allow for traffic - and be very watchful around the schools, as buses, cars and children are all coming and going at the same time. After the first few days things generally settle down.

I also remind drivers to watch as buses pick up and unload at bus stops and driveways around the county. Children may get excited and run across a road without looking. It is crucial that parents reinforce school bus safety rules children learned at school. Motorists should remember that passing a stopped school bus is a very serious offense. It could cause you to lose your driver's license along with a heavy fine.

According to the National Highway Traffic Safety Administration an average of 19 school-age children die in school traffic related accident each year. Many more are seriously injured.

By giving yourself a little extra time these first few days, and talking with your child about basic safety rules, you will reduce your frustrations as well as your chances of being involved in some tragic accident - and increase your child's safety to and from school.

We want this to be a safe school year for everyone.

## Anson Landfill Now Accepting Used Cooking Oil

The Anson Landfill, located off Highway 74 between Wadesboro and Polkton, now accepts used cooking oils. There is a tank in place at the landfill, and a vender is set up for picking up the product. They are looking into the feasibility of having the program at all of the convenience sites in the future.

According to David Jones, District Manager at Anson Landfill, "The end product of the used cooking oil will be a renewable green diesel fuel that has comparable properties to petroleum-based diesel. The renewable diesel can be shipped by pipeline, and it meets low-carbon fuel standards. For more information contact Jones at 704-694-6900.

## Horse Owners Urged to Vaccinate Horses Again Mosquito-Borne Diseases

It's mosquito season and it's time for equine owners across North Carolina to talk to their veterinarians about protecting their animals from mosquito-borne diseases. West Nile Virus and Eastern Equine Encephalomyelitis are endemic across North Carolina and can cause illness and death, but they can be prevented with a sequence of two vaccines.

In 2012 there were 20 confirmed cases of EEE and three cases of West Nile Virus, but state officials say they expect up to four unreported cases for each one confirmed, making the possible impact much larger.

"North Carolina has an extended mosquito breeding period, so every horse owner should talk to their veterinarian about how to protect their animal year-round," State Veterinarian David Marshall said. "In addition to getting animals vaccinated, everyone needs to be extra vigilant now to reduce breeding ground for mosquitoes. Take the time to rid your yard and pasture of standing water to reduce the risk."

The EEE and WNV vaccinations initially require two shots, three to four weeks apart, for horses, mules, and donkeys that have no prior vaccination history. Neither vaccination fully protects the animal until several weeks after the second shot, so it is best to vaccinate as early as possible.

Symptoms of EEE include impaired vision, aimless wandering, head pressing, circling, inability to swallow, irregular staggering gait, paralysis, convulsions and death. Symptoms of WNV in horses can include loss of appetite and depression, fever, weakness or paralysis of hind limbs, convulsions, impaired vision or hyperexcitability.

People, horses, and birds can become infected from a bite by a mosquito carrying the diseases, but there is no evidence that horses can transmit the virus to other horses, birds or people through direct contact.

For more information contact your local veterinarian or Extension Agent Jessica Anderson at 704-694-2415.

## Health Department Tips to Avoid Obesity

One in three children in the United States is overweight or obese. Childhood obesity puts kids at risk for health problems that were once seen only in adults, such as type 2 diabetes, high blood pressure and heart disease. The good news is that childhood obesity can be prevented! In honor of National Childhood Obesity Awareness Month, Anson County Health Department encourages your family to:

- **Get active outside** walk around the neighborhood, go on a bike ride, or play basketball at the park.
- **Limit screen time** keep inactive (sitting down) screen time to 2 hours or less a day.
- **Make healthy meals** buy and serve more vegetables, fruits, and whole grain foods.

Taking small steps as a family can help your child stay at a healthy weight.
