# THE EDUCATION OF **OUR CHILDREN IS** WORTH DEFENDING

Either Raleigh does not understand the needs of our classrooms, or they do not care. As your next State Senator that will change.

I know what our teachers and students need, and together with a Governor and Legislative team that want to make our children's future a priority, we will get it done!

#### As a veteran teacher who loves to teach and your next State Senator, I will fight to ensure that public education:

- Funds are fully restored with the \$500 million from classrooms are restored. (Coincidentally the cost that we have to pay because our politicians refuse to expand Medicaid.)
- Teacher Assistants positions are fully restored. Restore Advance Degree Pay for all teachers.
- Classroom size caps are re-enacted so that NO child has to compete with 25 other children for the attention of one teacher. • Restore Longevity Pay and Teacher Academy.
- The priority will be public education which provides every child its best opportunity for learning.
- Fight for the restoration of "all" teacher benefits including Due Process (Tenure) for all teachers.
- Restore wages to a professional level and fully fund the Teacher Wage Step Process.
- Will PROTECT Public Education FUNDING every year and NOT just an Election Year!
- Will fight for University Professors to NOT have restrictions on the number of classes they teach so that much needed research continues.
- Restore the \$400 million in funding to universities to safeguard tuition heights.

The Education Law Council (ELC) and the Leadership Education Conference Fund have given North Carolina an "F" on how our legislators spend our money. The director of the ELC says, "Compared to other states, North Carolina has a pretty good fiscal capacity for spending - but it isn't spending its money on public schools."

Our children's future should be a priority and we should not place our children's future in the hands of elected officials who say one thing, but do another.
